1. Role Definition

Payment Execution handles the back-end processing of a movement funds from a debtor account to a creditor account. Payments need to have been authorized and validated against customer/bank agreements before being instructed to Payment Execution. Payment Execution then determines whether debtor and creditor accounts are held within the bank and if not selects the appropriate payment mechanism/channel to use to complete the transfer. It is responsible for ensuring that both (or neither) sides of the exchange are completed successfully

2. Example of Use

Example of use:

Funds are transferred from a customer's account with the bank to a payee account held at another bank

3. Executive Summary

This service domains processes the movement of funds between accounts within the bank or to/from an account held with another bank, selecting the appropriate payment mechanism

4. Key Features

Determine the appropriate payment mechanism

Retrieve counterparty payment instructions/preferences

Generate creditor and debtor instructions

Confirm (and report) both legs of the movement are completed
