#### 1. Role Definition

The service domains administer the provisioning and distribution of product inventory across the branch network and/or organizing distribution direct to customers (e.g. using mail services) where appropriate. The administration function keeps track of inventory holdings and administers a provisioning schedule to acquire replacement inventory as needed to meet requirements

### 2. Example of Use

#### Example of use:

The distribution of 'take-one' product marketing materials distributed through the branch network is administered in support of a product sales campaign. Brochures are ordered and distributed to ensure branches are supplied with sufficient inventory to meet customer demand

# 3. Executive Summary

Administer the provisioning and distribution of product inventory across the branch network and/or distribute direct to customers (e.g. mail) where appropriate

## 4. Key Features

Product inventory tracking

Replacement inventory provisioning

Inventory distribution across the branch network

Inventory distribution through bulk correspondence
