1. Role Definition

Relations

Consolidate market information from multiple sources and in any suitable media/format in order to build a bank financial market knowledge-base. The service domain activities include maintaining, refining, qualifying/verifying and presenting information in order to improve the quality of the available market intelligence within the bank

2. Example of Use

The bank consolidates multiple sources of private company merger and acquisition activity in order to maintain a view of private company players in a target sector

3. Executive Summary

Market information management consolidates and improves market information from multiple sources in order to build up a bank knowledge base in targeted areas

4. Key Features

Determine the required scope of market information to be maintained

Source suitable market information sources and consolidate records

Verify and qualify the accuracy of the information

Structure/present the information in reports suited to business analysis and review
